Alex is an ambitious and passionate developer who is committed to continuous learning in order to stay up to date with the fast-evolving world of web development. With over 10 years of experience in various roles across the industry, I thrive on building meaningful digital solutions. I enjoy meeting people, discussing innovative startups and technologies, and sharing ideas that inspire growth and collaboration.

WORK EXPERIENCE

Senior Software Engineer Jul 2025 - Present
Icopify LTD, UK - Liverpool

Lead the backend development team by guiding technical decisions and ensuring best practices across projects. Actively review and optimize code to maintain high-quality standards, while collaborating with team members to create a productive and scalable development environment. Contribute to the design and implementation of core features, including building and maintaining an admin dashboard panel that enhances operational efficiency and supports business needs.

Full Stack Developer Jun 2023 - Oct 2024
Desenio AB, Stockholm, Sweden

My job as a full-stack developer involves using Next.js and PHP/Laravel to design and deliver advanced, scalable features for high-traffic e-commerce platforms like PosterStore and Desenio. I've contributed to major improvements in their content management systems, improved product workflows, and built robust, performance-optimized shopping experiences that support rapid growth and smooth user engagement.

Front End Developer Feb 2022 - May 2023
H&M, Stockholm, Sweden

As a frontend developer, I have extensive experience in writing high-quality, maintainable code. I've contributed to several portfolio brands, including COS and Monki, where I successfully implemented A/B tests to enhance user experience and performance. My primary focus has been on H&M's "MyAccount" section, where I ensured seamless tracking of consignments, user details, and order flows.

Co Founder Mar 2021 - Oct 2022
Takenjob AB, Stockholm, Sweden

As Co-Founder and Full-Stack Developer at TakenJob, an employment agency based in Stockholm, I played a key role in building a platform that connected companies with qualified candidates. I led development efforts across both the frontend and backend to deliver a secure, scalable, and user-friendly product. On the frontend, I designed the entire website using Vue.js/Nuxt.js, Tailwind CSS, and SCSS. Key features included user account creation, CV generation, and advanced job search functionality—delivering a smooth and intuitive user experience.
